African Fusion
PROFILE

AFRICAN FUSION: THE OFFICIAL PUBLICATION OF THE SOUTHERN AFRICAN INSTITUTE OF WELDING – SAIW

African Fusion aims to provide up-to-date insight into welding technology and the welding industry in southern Africa. Published quarterly and posted with **MechChem Africa**, the publication is split into three sections.

The opening pages deal with SAIW news and related events. As the custodian of welding standards and technology in the region, this section strives to promote best practices and standards, such as ISO 3834 – Quality Requirements for Fusion Welding of Metallic Materials. At the heart of this section is an SAIW member profile, which profiles one of the SAIW’s successful member companies.

The central section of the magazine includes one or two technical papers, which are vetted by the SAIW technical staff and usually sourced from IIW International conferences or through the Institute from local welding researchers.

The closing third of the magazine features stories from the southern African welding and fabrication industry and its supplier base. Here, we strive for original and technically rich content based on site and company visits and interviews.

African Fusion is the only publication dedicated to welding on the African continent.
